Fixed local actions: full-train effects and conditional sampling variance
Same W, hub and eight directions; no training or QPS claim
WebVid: observed quality feedback
Full 4096
Original batch 128
Queries with any hit change
Frozen pre-update step
WebVid: gains and harms
Anchor-entry near stratum
Complement
Hit events across 80 fixed actions
Gains
Losses
WebVid: aggregate ratio 1.074
Per-context variance ratio
Equal variance
Aggregate gate: 0.5
Stratified / uniform U variance
Frozen pre-update step
Yandex: observed quality feedback
