Same-state gradient substitution: small positive signal, most updates quality-flat
No state is propagated; context totals are not one deployable model
WebVid: actual deterministic one-step outcome
Original batch-gradient update
Full-train-gradient update
Net hit change across 4096 queries
Independent frozen pre-update step
WebVid: sampled opportunity vs actual update
Best of original eight actions or no-op (post hoc)
Full-gradient deterministic step
Net hit change across 4096 queries
Independent frozen pre-update step
Yandex: actual deterministic one-step outcome
Original batch-gradient update
Full-train-gradient update
Net hit change across 4096 queries
Independent frozen pre-update step
Yandex: sampled opportunity vs actual update
Best of original eight actions or no-op (post hoc)
Full-gradient deterministic step
Net hit change across 4096 queries
Independent frozen pre-update step
